

Product name Innoprep 019

File number 498-019

PRODUCT FAMILY Cleaning solvent

DESCRIPTION Cleaning solvent and pre treatment for plastic and composite.

INTENDED USES Innoprep 019 is used to clean surfaces of PVC and composite before painting. However, for dirty surfaces, it is essential to clean these surfaces with Innoprep 107. Innoprep 019 acts as a pre treatment/final wash before the application of primer and top coat

PRODUCT CHARACTERISTICS

To be efficient, Innoprep 188 should be utilised according to a strict method.

Always use clean, lint free and white rag. Do not clean a large surface at a time. Keep in mind that Innoprep 188 must be wiped to avoid the drying of the solvent on the cleaned surface. Wipe Innoprep 188 with a clean and dry rag. Change often the rags of Innoprep 188 and the wiping rag.

Be sure that Innoprep 188 is dry and there is no trace of solvent on surface to be painted.

Wait 2 to 5 minutes before the application of finishing products. Do not prepare surfaces more than two hours before the application of finishing products.
